

FOUNDATION

Funding research that leads to the prevention and cure of asthma and allergic and immunologic disease

Annual Report

2019–2020

Chair

Kevin J. Kelly, MD, FAAAAI
(2019-2022)

Maintaining Focus and Momentum in the Face of a Pandemic

It should not be lost on us that the year 2020 (perfect vision according to my ophthalmology colleagues) makes us refocus on our mission and take the time to be grateful for everything you, our supporters, have done to advance our specialty. Since the rebranding of the philanthropic arm of the American Academy of Allergy, Asthma & Immunology (AAAAI) in 2015, the AAAAI Foundation surpassed our expectations by funding 16 Faculty Development Awards – thank you for your generous donations, which helped make this possible.

Your donations are used to expand the AAAAI Foundation’s endowment, which allows us to grant multiple new awards each year. These awards change the lives of our investigators and assist our academic programs in graduating new allergy/immunology specialists by maintaining excellent educators.

So, as we celebrate success in our 2019 – 2020 Annual Report, please know that we are counting on all of us to give back to support and advance our specialty. The pandemic has caused unprecedented medical harm to our patients. The invisible invader has been extremely contagious and dangerous to our patients’ lives and livelihoods. Concurrently, our specialty has seen economic strife in both private and academic medical centers like no other time. Not surprisingly, our donations have declined substantially since March 2020 and the change to future virtual meetings will reduce our capacity to interact with you personally. We continue to need your help to maintain our philanthropic mission and get through this time together.

Thank you again for all you do!

2019 Council Members

Vice Chair and Lectureships Chair
Jonathan A. Bernstein, MD, FAAAAI
(2019-2022)

Annual Giving Chair
Sharon B. Markovics, MD, FAAAAI
(2019-2021)

Research and Long Range Planning Chair
Mariana C. Castells, MD, PhD, FAAAAI
(2018-2021)

AAAAI Secretary-Treasurer
Giselle Mosnaim, MD, MS, FAAAAI
(2019-2021)

Special Events Chair
Joseph D. Diaz, MD
(2018-2021)

Capital Campaign Chair
Stokes Peebles Jr., MD, FAAAAI
(2018-2021)

AAAAI President-Elect
Mary Beth Fasano, MD, MSPH, FAAAAI
(2018-2020)

AAAAI Immediate Past President
Robert A. Wood, MD, FAAAAI
(2019-2020)

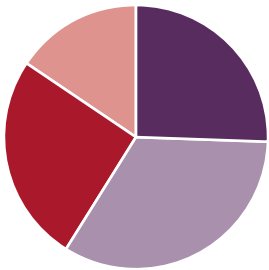

Grants Chair
Mitchell H. Grayson, MD, FAAAAI
(2019-2022)

Executive Vice President
Thomas A. Fleisher, MD, FAAAAI
Ex-officio Member

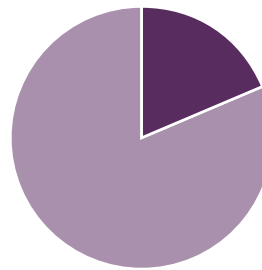

Total Revenue:

- GAIN Campaign: \$325,030
- Named Lectureship Series: \$416,406
- Benefit: \$322,325
- 5K Run/Walk: \$195,070

\$1,260,831

Total Expenses:

- Admin: \$85,823
- Fundraising: \$371,719

\$457,542

Grants Paid in 2019:

\$720,000

2021 AWARD TIMELINE

Top Finalists Notified:	October 7, 2020
Complete Applications Due:	November 13, 2020
Review Results Announced:	January 2021

This mentored award provides \$240,000 in funding over a three-year period and is intended to support the development of careers in Allergy and Immunology. Multiple awards will be made to further the development of junior faculty into independent investigators by funding excellent research that leads to the prevention and cure of asthma and allergic and immunologic diseases.

AAAAI FOUNDATION

**FACULTY
DEVELOPMENT**

AWARD

Award term is July 1, 2021 to June 30, 2024. For complete details, please visit aaaaifoundation.org

American Academy of Allergy, Asthma & Immunology Foundation
555 East Wells Street, Suite 1100 • Milwaukee, WI 53202 • 414-272-6071 • aaaaifoundation.org

Mark Gorelik, MD

The AAAAI Foundation & Richard F. Lockey, MD, MS, FAAAAI & USF A/I Program Faculty Development Award

Project: Follistatin Like-1 Protein is a Modulator of Immune Response in Inflammatory Vasculitis

Columbia University School of Medicine

“ This award has been simply transformative, and will allow me to supplement my other funding such that I can have a full laboratory and pursue the next steps in the research questions I have.

Understanding the immunology behind cardiac inflammation in Kawasaki Disease and vasculitis, and also understanding the immunologic function of the protein Follistatin Like-1 Protein.

I hope to understand how immunology applies to cardiac inflammation in Kawasaki disease, and also am very interested in early life immune ‘suppression/plasticity’ and how it shapes immune responses and/or could be re-activated or applied in later life. My career goals are to continue with research as long as I am able and to continue in academic medicine. ”

Onyinye I. Iweala, MD, PhD

Project: Glycolipids and Invariant Natural Killer T Cells in Alpha-gal Syndrome

The University of North Carolina at Chapel Hill

“ The Faculty Development Award will provide critical funding to help me pay for the technical support (i.e. lab technician) and the reagents that I need to get my research off the ground. It will fund the experiments that I need to eventually put me in place to apply for my own independent funding, like an NIH R01 grant.

Patients with alpha-gal allergy, characterized by delayed anaphylaxis to mammalian meat, have been reported across the globe, yet we have limited understanding of the mechanisms underlying this condition. With my research, I will explore the role of glycolipids and unconventional T cells in this allergy with the vision of broadening our understanding of glycolipids and unconventional T cells in hypersensitivity disorders. This research may also link tick exposure to an activation and cytokine profile in unconventional T cells that promotes allergic responses.

My overall career mission is three-fold: (1) To make groundbreaking discoveries in immunology that lead to effective therapies for allergic conditions, in particular, idiopathic anaphylaxis. (2) To nurture future generations of physician-scientists in Allergy and Immunology. (3) To promote inclusion and diversity in the field of Allergy and Immunology. For the immediate term, I want to advance the field of food allergy by expanding our understanding of alpha-gal syndrome. ”

Michael G. Sherenian, MD

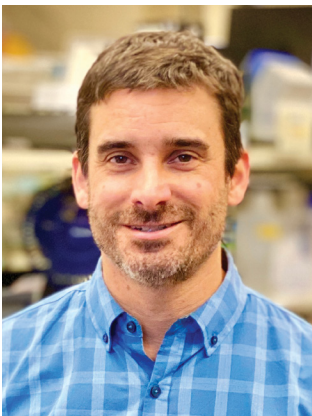

Project: The Role of Hemostasis in Atopic Dermatitis

Cincinnati Children's Hospital Medical Center

“ As a Faculty Development Award recipient, I will have additional funds to further investigate the link between atopic dermatitis and hemostasis. In addition, the prestige that comes with being a reward recipient will help me establish myself as an investigator at this early stage within my career.

The goal of my laboratory's research is to determine the hemostatic system's role in the inflammation seen within pediatric atopic dermatitis. In order to accomplish this goal, my laboratory uses several means of investigation that use human data, animal models, and ex vivo/in vitro assays.

Throughout the course of my career, I plan to investigate the interplay between the clotting and immune systems, with a focus on their impact on allergic disease pathogenesis. I view my research as being at the intersection of my desire to advance scientific knowledge and to improve patient care. Thus, I hope that one day my research can be used to generate novel therapeutics for allergic diseases that improve our patients' quality of life. ”

Jeffrey Wilson, MD, PhD

Project: Investigations into the Glycolipid form of the Mammalian Oligosaccharide Galactose- α -1,3-Galactose (α -Gal) as an Agent of IgE-mediated Delayed Anaphylaxis and Atherosclerosis

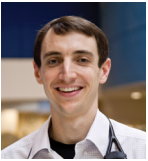

University of Virginia

“ In the face of the usual setbacks that seem to befall most junior investigators, the award has been a welcome affirmation of my work to date. The award has also provided a funding foundation that makes it easier to focus on today's research and tomorrow's NIH grant application.

Current work focuses on antibody responses to food allergens, with a particular interest in understanding mechanisms and health implications of IgE to alpha-gal. The approach is multi-faceted and includes epidemiological, clinical and mechanistic investigations, the connection between alpha-gal sensitization and tick bites is an area of ongoing interest, as is the “glycolipid hypothesis” as a putative explanation for the unusual delay that occurs between meat ingestion and symptom onset.

We are also investigating connections between IgE to alpha-gal and conditions not traditionally associated with allergic disease - namely coronary artery disease and isolated gastrointestinal symptoms that might be labelled as irritable bowel syndrome.

Continue to do collaborative research that pushes our field forward and helps our patients. ”

2020 Grant Impact Study Results

94%

of award recipients have achieved permanent A/I faculty positions.

\$7,120,000

has been granted as major awards since 1993.

\$82,393,140 more

has been granted to our award recipients after Foundation provided initial support.

Each year we look forward to sharing pictures from our successful signature events - Annual Benefit and 5K Run/Walk. These two annual events are not only a celebration and opportunity for all of us to connect, but they provide vital funding that helps the Foundation award multiple Faculty Development Awards each year.

While we missed all of you at our events, our sponsors honored their generous pledges to the AAAAI Foundation mission!

We are extremely grateful to have support from the following sponsors:

*AAAAI Foundation
8th Annual 5K*

Run/Walk

AAAAI Foundation

Benefit

*Grow Allergy and Immunology Now
